

Note: Flatstoppers hold tires with diameters from 25" to 30".

"I bought FlatStoppers to park my car on for the winter inside a car capsule so it could be left in neutral with the e-brake off. IF YOU HAVE ANY DOUBT ABOUT THESE RAMPS, GIVE THEM A TRY. I was trying to be gentle backing the car up on these things and was expecting them to 'squirt out' from behind the tires—but they did not budge. Whatever they are made of is super lightweight, but very tough."

FLATSTOPPERS™

Quantity: 4

22.3" long x 3.5" high x 14" wide Product: RR-FS

This product helps to keep your tires from flat spotting during long periods of storage. Once the tires are set in the FlatStoppers (on a level surface), they will settle into the pad's concave depression. More of the bottom portion of the tire will be fully supported, thus dispersing the weight of the car more evenly onto the tire and helping to prevent any flattening. FlatStoppers will not conduct heat or cold to your tires despite changing floor temperatures, will not damage your floor in any way, and will not slide.
